Software Requirements Document

for

TODO: Task Management System

CS 472

Draft 0.1

Prepared by:
Tim Grediagin
Devin Jones
Brent Mello
Blake Eggemeyer

February 10, 2012

Contents

1 Introduction

1.1 Purpose

1.2 Scope

1.3 Definitions

1. **GUI:** Acronym for Graphical User Interface. Used to refer to the look and feel the user experiences.

2. **Immediately:** Immediately refers to actions that will begin as soon as the user has given the input for the action to occur.

3. **Should:** Requirements with this marker are desired, but not crucial, and will be a part of the final deliverable contingent on time and progress.

4. **TBD:** Acronym for To Be Determined. This is used in this document to signify that the information necessary for a part of this document is "To Be Determined".

5. **User:** The person, or persons, who operate or interact directly with the product.

6. **Will:** Requirements with this marker are guaranteed to be in the final delivered product.

1.4 References

Written with the IEEE Recommended Practice for Software Requirements Specifications as a reference and guide. The Tsunami SWR and RPC Donor SWR were referenced to find appropriate wording for some sections.

1.5 Revision tracking:

0.1	Feb 10	Document constructed.

2 Overall description

2.1 Product functions

1. TBD

2.2 User Characteristics

2.3 Constraints

2.4 Assumptions and Dependencies

1. **Time information:** The software relies on time information from the computer it is running on. Inaccurate clock data will be reflected in the software output.

2. **Language:** The interface for the user is in English.

3. **Platform:** The platform has not been specified.

2.5 Apportioning of requirements

3 Specific requirements

3.1 Functional requirements

3.1.1 Displayed data for tasks

3.1.1.1 —: —

3.1.2 Modification of fields

3.1.2.1 —: —

3.1.3 Interactions

3.1.3.1 —: —

3.2 Non-functional requirements

3.2.0.1 —: —

3.3 Performance requirements

3.4 Software system attributes
